## KEY SERVICES

---

### WEBSITE DEVELOPMENT

The website has now become the face of any organization. Any client first visits the website and this forms a lasting impression.

Each aspect of website starting from color combination to navigation to compatibility with browsers and mobile devices leave a mark on the visitor about the company.

Our team of Graphic and web designers first understand the company profile and its activities and based on that prepare several design options. Once the option is selected, our team of developers strictly follows W3C guidelines for website design thus make it browser independent.

ASI also has large experience of overseas markets and we have developed websites for our Russian and British and Japanese clients and we have the distinction of developing more than 70 Government of India websites.

#### Content Management System

We have separate teams for development teams under various platforms of development activities starting from Classic to Complex dot net platforms to Open Source. We have developed the detailed Content Management System that provides option N Level Content Structure. The administrative interface developed for the same is so user friendly that a simple data entry operator with basic computer knowledge i.e. MS office would be able to manage each and every aspect of the website.

We also support Open Source CMS such as Drupal, Joomla etc..

**Security:** All websites are developed using strict security guidelines following OWASP top 10 guidelines and all government websites developed by us have been cleared by Cert-In empanelled agencies after security audit.

## APPLICATION DEVELOPMENT

ASI has a dedicated team of IT professionals that brings in large man years of experience along with them ranging from project managers, business analysts, SRS specialists, database specialists, open source specialists, testers, web security experts, content developers etc

We also excel in BPR and our dedicated teams of experts have provided solutions in government departments in 7 states across the country.

Quality is the in forefront our all projects and products. All web applications follow the international conventions of application development which also includes critical security aspects and continuous technical support.

The days of Desktop applications are almost over. The world is fast shifting towards Web Based Applications thus saving hugely on infrastructure and communication costs.

We at Akiko Sherman Infotech has been extensively involved in providing web based solutions starting from providing an E-Learning Solution to a prominent U.K University way back on year 2001. During the last 10 years we have developed a numerous web based applications under various domains starting from health sector to enterprise applications for various state government departments to leading Digital Media companies. Some of the key applications are:

Studio Prem: AN online application was developed through which smaller studios used to send their print order online to Pre Studio. Basic require was bandwidth optimization as the files used by photo studios are of the size of 10-15 MB JPG files. Our system used to have the facility of Lossless JPG compression upto 63% and then the files were sent to Prem Studio for printing.

Geological & Mining Department-Government of Gujarat: The entire process of applying for mining lease to approval by various levels of government to filling of monthly and annual returns by lease holders has been made online. The system has a module for illegal mining as well.

Medical Stores Organization: The application has interface for head Office i.e. MSO, GMSD (General Medical Stores Depot) five in number, Indenters (approximately 600 in number including CRPF and CHGS and Safdurjung Hospital) and Suppliers. The entire process has been made online starting from filling up of indents to indent compilation to issue of supply order to receipt of medicines from suppliers using barcode readers to issue of medicines to indenters.

HBTE: An application for the Haryana State Board Technical Education has been developed in which entire process of the college from student enrollment till their job placement has been made online. The entire process caters the following modules: Assigning of Courses and its subject to different college, Student enrollment in a particular center, Students Educational & Financial data & Students placement details. The Job portal for the Institute was also developed wherein the different employers would be able to register so as to search and hire the students from the Institute based on students Academic records.

IWAI: In order to accomplish the vision of e-Governance a WEB Based Integrated Management Information System (IMIS) for Inland Waterways Authority of India is developed. The System is extremely important for effective planning, monitoring and implementation of various activities of the IWAI at 3 operational levels (Head Office, Regional Offices and Sub Offices) and easy availability of data to all the concerned agencies. The current system covers the following modules:

1. Project Management
2. Vessel Management
3. Hydrographic Survey
4. Terminal Management
5. Establishment
6. Administration
7. Finance

Career Air Force: The entire process of Candidate Registration, Centre selection and seat allocation for Selection to Indian Air force has been made online. The current system covers the following process:

1. Candidates Registration
2. Auto Eligibility Check of the candidate based on their education and marks secured

3. Course selection for candidates based on their eligibility
4. Admit card generation
5. AFCAT Result
6. Allotment of dates and venue of SSB Testing to selected candidates based on their preference.

## CORPORATE / PRODUCT PRESENTATIONS

We have a dedicated team of conceptualizes and designers and we have been involved in design and development of product and corporate presentations using latest state-of-the-art tools. Some of the presentations developed are for

EDUONLINE: Presentation for the E-Learning Tool

NIC Offerings: This presentation provides glimpses of various services and tools offered by National Informatics Centre. This presentation is scalable and using database, the NIC team can include more products and services without change in code.

CIC: The Government of India is spending huge amount for the development of North East region. For this the Ministry of Communication and IT has set up large number of Community Information Centres across the region. A presentation was prepared to highlight the functions and achievement of these initiatives.

## CORPORATE TRAINING IN IT AND BPO

Since the year 2003, training has become a synonym with ASI. In partnership with IBM and later on with the launch of its own courses, ASI has become a major player in IT and BPO training.

ASI has a wide spectrum of courses for beginner, intermediate and expert levels. Since 2003 we have trained more than 5000 students both in IT and BPO through our corporate centre and franchisees.

For corporate clients we have dedicated team of content developers and technical writers and we provide customized course modules both onsite and at our corporate centre.

Till 2007 ASI had more than 50 franchisees under the name of Akiko Callnet for training in BPO segment and through our unique placement programs in partnership with prominent call centres have placed more than 7000 candidates across the country.

## OUR CLIENTAGE

---

ASI has the distinction of serving more than 100 clients during the last 16 years of our establishment and number of them now relies on us for all their IT requirements. The client list includes reputed Government Organization, associations, Institutions, Universities and overseas organizations.

*Reference of your letter.*

1. Please refer Air HQ/22242/AFCAT/PO 3(A) dated 06 Jun 12.
2. As you are aware, career website of the IAF ([www.careerairforce.nic.in](http://www.careerairforce.nic.in)) was successfully converted to an interactive website by NIC. This facilitated nearly 1.2 lakh applicants to successfully submit their applications for Air Force Common Admission Test (AFCAT) scheduled on 26 Aug 12.
3. Despite the heavy rush to fill online applications, the website functioned well owing to the close monitoring carried out by personnel of NIC. Please convey our gratitude to the team led by Mrs Neeta Verma and Mr Vijay Kumar Vishvakarma who extended all support for hosting the website.
4. On behalf of the IAF, I would like to place on record our sincere appreciation for the personal interest taken by you in the project and we hope that we will continue to get the same extent of support as we move forward.

*With regards,*

*Yours sincerely,*

**Subject:** SAN and Tape Back up implementation at LNDC

Dear Dr. Ringe,

This is to thank you very much for your proactive support to the SAN and Tape-backup Implementation for securing CTRI data.

I wish to inform you that last week I attended the Drug Information Association (DIA) meeting in Washington DC where I was asked to make presentation of CTRI.

**In the meeting I was happy to learn and share with you that CTRI was seen as the number 3 registry in the world after USA and EU. I thereupon mentioned publically there that the CTRI is developed**

**by our own system at NIC.**

Warm regards,  
Arvind Pandey
